

Process Readiness for RPA

Ensure Your Process is Ready to Automate. Activities include:

- ✓ Process Review
- ✓ Identify Gaps
- ✓ Remediation List
- ✓ RPA Plan

Ensure Your Process is Ready to Automate

Not every process is ready to automate: some aren't fully documented, some need process changes prior to optimization, some are incomplete. Optezo's Process Readiness for RPA Workshop assesses processes for automation readiness by addressing technology, training, and process design gaps.

Our Process Readiness for RPA workshop ensures that your process is ready to be automated. Activities include:

Process Review

Review the process for automation suitability

Identify Gaps

Identify gaps in technology, training, and process design that require remediation

Remediation List

Generate a remediation punch list prioritized with immediate, mid-, and long-term activities

RPA Plan

Develop a detailed plan and timeline that defines prerequisites for RPA launch

Optezo helps enterprises scale their automation programs

Want to learn how our Automation CoE Assessment & Roadmap Program can deliver sustainable value to your enterprise? Gain a smarter, more actionable understanding of how to fully align your organization with the benefits of intelligent automation
